PROFESSIONAL SUMMARY

Information Systems and Technology student with hands-on experience using SQL, PostgreSQL, Python, Excel and Power BI to clean data, answer business questions and build interactive dashboards. Brings **nearly five years in television broadcast and media production**, plus practical IT support and digital-content operations. Seeking internship or early-career opportunities in data analytics, business analysis, reporting or business intelligence.

TECHNICAL SKILLS

Analytics: SQL, PostgreSQL, Python, Excel, Power BI, Power Query, DAX, pandas

Methods: Data cleaning, exploratory analysis, KPI reporting, data modelling, trend analysis, requirements analysis

Visualisation: Plotly, Streamlit, Power BI dashboards, Excel PivotTables and charts

Other: Git, GitHub, HTML, CSS, JavaScript, video editing, graphic design, technical support

PROFESSIONAL EXPERIENCE

Digital Media and Content Specialist | S.H.E. Social, LLC

Nov 2025 - Present

Remote | Florida, United States

- Support digital production and content workflows for business owners, ministries and personal brands across Instagram, Facebook, TikTok and YouTube Shorts.
- Edit short-form video, create branded visual assets, organise files and coordinate content preparation within a remote team.
- Apply clear communication and structured workflow management to maintain consistent client deliverables.

IT Support Specialist | Rainbands Multimedia

Mar 2020 - Jun 2024

Kempton Park, South Africa

- Troubleshoot hardware, software, connectivity and connected-device issues for users and workstations.
- Supported workstation setup and software maintenance, explaining solutions in clear, practical terms.

Broadcast Operations and Media Production Professional | ATV Channel

Feb 2018 - Sep 2022

Kempton Park, South Africa

- Supported live television production, broadcast operations, video editing and studio workflows in a deadline-driven environment.
- Created programme graphics and prepared media content while coordinating with production teams.

SELECTED ANALYTICS PROJECTS

Consumer Complaints Intelligence | PostgreSQL, Python, pandas, Plotly, Streamlit

Analysed 490,639 official CFPB complaints using reusable SQL, CTEs, window functions and a three-month moving average. Identified a 117% complaint increase in January 2025. Live dashboard · GitHub

AI Data Analyst — Ask Your Data | Python, pandas, SQLite, Plotly, Streamlit

Built an interactive app for CSV and Excel uploads with data-quality checks, KPI summaries, chart exploration, SQL analysis and generated business insights. Live app · GitHub

UK Online Retail Performance Dashboard | Power BI, Power Query, DAX

Built a three-page report covering sales, customer behaviour, products and returns; reported £9.77M net revenue and an 8.4% return rate. GitHub · Download PBIX

Nexus Supply Chain Analytics (Synthetic Data) | Excel, Python, pandas, Plotly, Streamlit

Analysed a synthetic £115.18M inventory dataset to assess stockout exposure, delivery performance, supplier risk and lead times; built an interactive dashboard and six-month forecast. Live app · GitHub
